CIVIL ENGINEERING DESIGN DAY 2012

New Designs for the Mattin Center

The Mattin Center on the JHU Homewood Campus is presented to the student seniors in Civil Engineering as a backdrop for creative design to meet the common need for organic growth or expansion of the built site. Students will develop design concepts for new construction within an existing building context, exploring the changing materials and building techniques of distinct construction periods and how to balance the physical present with designs for the future. Four teams will be presenting their work, with the overarching goal of adapting this dynamic site to the ever-changing needs of a growing academic community.

Friday, May 4, 2012

1:30pm  Welcome Remarks
1:40pm–3:55pm  Four 30-minute Team Presentations
4:00pm–4:20pm  Concluding Remarks, Q&A
